Dear Mr. Maharshi,

I would hereby ask your help with respect to the publication of your book "Maharshi's Masterly Plan for Creating Heaven on the Earth". Here in Slovenia I could not get the following information: which languages besides English have your books been translated into. I am particularly interested in Slovene or German translation. In the case there are such translations, please inform me where I could get them. If, however, there aren't any, where could I obtain an English version?

I am interested in your books because I want to get a detailed insight into your philosophy. Namely, these days I have finished a book of almost 700 pages entitled "A Destructive Society and Its Friends - Is There Any Hope for Man and Nature?" (for your information I am sending you the introduction part and the contents), which I have already sent to the publisher. In this book I also discussed your philosophy derived from the book on transcendental meditation by Predrag Kezela, which was published in the Croatian language. Your teaching was presented in the chapter on all the attempts to change this destructive world of today. I wish your ideas would soon become reality rather than Utopia.

In this book of mine, I also have many utopist ideas, but - considering the present situation regarding mankind and the destructive course of evolution

from the very beginnings on - we have got very little hope left. I am neither a pessimist nor an optimist like you are. Instead, I try to see the present state and development of the society realistically. People believe their leaders who are supported in destruction by its allies - INTELLECTUALS ! Few outstanding exceptions cannot do much about it; common people follow their strong leaders as long as these are supported by the intelligentsia (and, of course, by arms). You are trying to convert them by meditation. Knowing materialism of the spirit and the possibility of such influence, I do not ascribe any mysticism to it (you being a physicist, I am an engineer). Unfortunately, most people refer to these methods as to something mysterious and abstract, although people like you and me do not think so.

I do not know what was the response to your appeal addressed to all the governments of the World; when I read it I agreed with it wholeheartedly. Have you at least received a decent replay? Few years ago I gave an advertisement in a paper with the circulation of 200 thousand readers. There I applied to the intellectuals, especially scientists (myself, I see the possibility of escape from destruction in the society's control over science) to form a party for salvation of the country and its nation. In my appeal I was very concise and clear as you were in yours. Result: eight people turned up! One of them was a scientist, another one a common man while the rest were trying to make a political career.

Perhaps I am wrong because I do not know your philosophy in detail, but it seems that an important fact has been left out there, namely, the fact that these connoisseurs of destruction of our miserable society also meditate, however, in the opposite direction. They do not call this meditation, but session(s) or conferences. Various managerial boards of different companies, presidencies, meetings of activists, etc. meditate subconsciously for the sake of their conscious egotism. Possessing money, authority and power, they also dispose of a wide range of information systems and media by means of which their "meditation" (some five hundred years back called "manipulation with people"

by Macchiavelli) renders them successful. When in addition using all sorts of weapons, including everything from a gun to an atom bomb, their dominance becomes indisputable.

I hope you do not mind my having taken the liberty to bother you with my viewpoints. After all, we both strive towards the same goal: a humane society.

I should greatly appreciate receiving the requested information.

With best thanks in advance,

Sincerely yours,
